

KIBRAY DC

6.5 ha data center site - Kibray, Tashkent region

A prepared infrastructure site for sale

36 Sharq Guli Street, Sharq MFY, Kibray district, Tashkent region

6.5
hectares of land, 65,000 m²

2
independent fibre routes

25
km to Tashkent

CASE Real Estate Advisory

About the site

Site area	65,000 m² (6.5 ha)
Intended use	a data center site: concept and design documentation prepared
Master plan zoning	technological industry area (Texnologik sanoat hududlari)
Permitted height	up to 3 floors
Seismic zone	8 points
Cadastral number	11:05:41:01:02:0105
Land tenure	permanent use right
Connectivity	two independent fibre routes
Design documentation	concept and design for a data center prepared
Encumbrances	none per the State Register
Elevation	606 m
Buildings	two permanent structures, held freehold, included in the deal

The site is vacant and ready for a transaction. Site visits by arrangement.

Areas and characteristics are stated per the extract from the State Register of Real Property Rights dated 05.02.2024; zoning and the seismic figure come from the object record on the Shaffof Qurilish portal. This information is for reference only and does not constitute a public offer.

Who this site is for

Commercial data center

primary scenario

The site was prepared for a data center: design documentation exists and two independent fibre routes are already in place. That removes years of approvals and the first stage of engineering works from the project.

Enterprise data center

banks, telecom, public sector

6.5 hectares allow data halls, a power centre and storage to be laid out with room for a second phase without hitting the site boundary.

IT campus

existing buildings

There are two permanent structures on the plot, both held freehold. They can serve as a site office, security post and storage during construction, or be demolished to free the layout - that is for the buyer's design to decide.

Industrial site

alternative scenario

The site adjoins a road with an operating industrial facility next door. It suits a production and warehouse complex if the investor is looking beyond digital infrastructure.

Deal structure

Sale

The site is sold as a whole together with the two permanent buildings. Per the State Register there are no encumbrances. Terms are discussed individually.

What the buyer receives

Permanent use rights to the 65,000 m² land plot and ownership of the buildings. The exact scope of design documentation and connectivity contracts is confirmed during the transaction.

Technical parameters

Utility connection parameters, the scope of design documentation and survey results are provided on request together with the document pack.

LOCATION

Kibray district, 25 km from Tashkent

**36 Sharq Guli Street, Sharq MFY, Kibray district,
Tashkent region**

DISTANCES

Central Tashkent	≈ 25 km
------------------	---------

Islam Karimov airport	≈ 29 km
-----------------------	---------

Kibray district centre	≈ 9 km
------------------------	--------

Coordinates: 41.452066, 69.507195

An industrial setting outside the city fabric: an operating production facility next door, yet under half an hour to central Tashkent by road.

Under the master plan the site sits within a technological industry area: the surroundings are industrial rather than residential. Boundaries, access and neighbours are shown during a site visit.

Development concept

The images show how the site could look once developed: a secured perimeter with a checkpoint, data halls, a power yard and external chillers. This is a concept, not the current state of the plot: what is for sale today is prepared land with fibre and design documentation.

All images are visualisations of a development concept, not photographs of the site. They do not constitute a public offer.

KIBRAY DC

Shall we discuss the plot?

We reply within the day - documents, utility parameters, a site visit.
